

# Carbonear Municipal Habitat Conservation Agreement

The Town of Carbonear and the Government of Newfoundland and Labrador signed a **MUNICIPAL HABITAT CONSERVATION AGREEMENT** in December 2025, committing to the conservation and enhancement of wildlife habitat within the town’s planning boundaries.

The agreement designates three Conservation Areas (CAs), totaling 2,200 acres: the **Carbonear Water Supply CA** comprises much of the town’s designated Public Protected Water Supply Area; the **London Pond CA** is a large open wetland with vegetated riparian buffers; and the **Island Pond Brook CA** includes the riparian areas along a portion of Island Pond Brook. The Town also designates a 1.5 km long riparian area along Island Pond Brook from below Columbus Drive to where it empties into Conception Bay as **The Ponds Stewardship Area** to highlight its environmental value to the community. These areas encompass some of the town’s most ecologically important wildlife habitats, including waterfowl, shorebirds, songbirds, and mammals.

## What to look and listen for:

**Northern Pintail**  
(*Anas acuta*)

**Ruby-Crowned Kinglet**  
(*Corthylio calendula*)

**Pine Grosbeak**  
(*Pinicola enucleator*)
